

MEASURE APPOINTMENT HOW TO PLAN/PREP

PRIOR TO MEASURE:

The cabinets must be completely installed, fixed in place and secured before we can measure.

All decisions regarding color/material choice, including appliances/sinks and faucets, etc will need to be provided to Humboldt Countertops & Surfacing (HCS).

Sinks and appliances must be on site for accurate dimensions to take place.

DAY OF MEASURE:

Completely clean off your existing countertops of all items prior to the HCS templators arrival.

Appointment will take approximately 30-60 minutes

Allow the HCS templator to gather all measurements needed. They will confirm all details at your appointment.

**This is the time to ask questions or make any changes. We highly recommend being present for this appointment.

EXPECTATIONS:

After your measure, a HCS templator will communicate any requested changes or additional costs needed to complete your job.

Any changes or additions being made to your project after this time by the client will delay the project or add additional charges depending on the scenario at hand.
